North American Gold Equities

Near-Term Gold Price Update; NAVs Adjusted to 2026E

NEED TO KNOW

- **Gold has averaged US$3,434/oz in 2025 in a range of US$2,625/oz to US$4,539/oz**
- **GLD (+69%), GDX, GDXJ, XGD (+155% to 175%) outpaced broader markets in 2026**
- **Developers crossing into producers benefitting from unprecedented prices, margins**

VTC Research

Gold Equities Exhibiting Leverage; Positive Performance Still Remains

- Snapshot: In 2025, gold has traded within the range of US$2,625/oz Au to US$4,539/oz Au, averaging US$3,434/oz Au (a 44% increase versus US$2,388/oz Au average in 2024). **Gold has traded well above US$4,000/oz for the last three months** after interest rate reductions, ongoing geopolitical events, a declining DXY (110 to 98), central bank purchases. Longer term, we believe the following drivers to assist gold: i) ongoing volatility from geopolitical events and uncertainties (including recent developments in Venezuela); ii) the potential for broader market weakness after ~16% to 19% annual returns on major indices (eg. S&P500, Dow Jones, Nasdaq) heading into a US mid-terms election year; iii) increased focus on the metals sector (expanded interest from critical metals and electrification); iv) potential for further US interest rate reductions in 2026. **Despite gold's strong performance, we see an opportune time to add or review select North American gold equities as key holdings based on current valuations.**
- Gold Price Derivation: Numerous factors and variables can impact the gold price, both near and long term (eg. central bank purchases/sales, VIX/market volatility, COMEX net long positions, DXY, investment and seasonality of demand, interest rates, inflation). Our long-term gold price assumptions are mainly derived from objective reviews and calculations of: i) current spot gold prices; ii) last three years of historical prices; and iii) the five-year forward curve (Figure 1). The last three years (2023 to 2025) have averaged US$2,588/oz Au, while the five-year forward curve derives an average ~US$4,700/oz. **Based on the average, this results in a long-term outlook toward ~US$3,900/oz Au price (Figure 2).**
- Near-Term and Long-Term Gold Price Outlook: Gold has demonstrated a US$3,300/oz floor since summer 2025 on the back of US-based tariffs, geopolitical events, interest rates and central bank purchases. **Our average near-term outlook of US$4,500/oz Au extends into Q4 2026 along with our mid-term (five-year average) equating to US$3,800/oz Au.** Nearer term, we estimate the following: **US$4,475/oz (2026E), US$4,100/oz (2027E), US$3,800/oz (2028E), US$3,500/oz (2029E).** Longer term, we estimate an average of US$3,150/oz Au for our modelling and NAV purposes, which equates to a 22% premium to the three-year trailing average (US$2,590/oz Au). See Figure 3 for previous and updated Au price assumptions including Ag prices.
- Leverage to Gold Prices: In 2025, **gold increased 44% since 2024's average, while the gold equities (as measured by XGD, GDX and GDXJ) have increased 155% to 175%, demonstrating equities' leverage** (investors invest in gold equities for multiples of the return on underlying gold price). The companies with the largest resource bases and longest mine lives are typically the most leveraged to gold prices (eg. Troilus Mining Corp., Gold X2 Mining Inc.). In other words, for small changes in the gold price, we would expect such companies to exhibit a higher degree of leverage in NAV/sh and resulting share price returns.

Valuation and Impact to Equities

- We have derived our targets using a NAV-based approach. **Based on the increase in our VTC long term gold price assumption, our targets have increased on average 25%.** We demonstrate the change in target prices, target multiples and current trading multiples in Figure 4.

Source: Company PEA, VTC Research, January 2026

1911 Gold Corporation (AUMB:TSX, C$1.70/sh target, Outperform)

- **Update**: 1911 Gold Corporation continues to advance the past-producing True North Au mine (100%, MB) towards production, which we estimate to commence in 2027 (modelled scenario of commercial production of ~65,000 oz/yr Au at US$1,300/oz Au AISC). In December, the company closed a C$23M private placement (flow-through and common shares). Financially, we remind investors that the company has ~C$300M in tax pools/losses from prior operations that can be applied to future earnings. Also, with a bulk sample planned for mid-2026 and at near-term Au prices of +US$4,000/oz, we estimate margins of ~C$50M, with free cash flow of ~C$40M vastly reducing the need for debt.
- **Catalysts for 2026:** We expect the company to release a PEA on True North in January 2026, outlining an underground mine plan and a modest capital program. By mid-2026, we expect the company to conduct a bulk sample in demonstrating viability of mining methods and reconciling modelled tonnes, grade and recoveries with actual mined/recovered data. With existing underground development, the company has commenced important underground drilling from an announced 25,000 m program (as of late September) focused on the SAM SE, SAM W targets and new Shore targets. Also on drilling, in December 2025 the company commenced a 2,200 m diamond drill program at Ogama-Rockland (27 km southeast of the True North mine and mill) with one surface drill rig to focus on resource expansion and confirmation drilling. We expect a company-wide resource update in Q3 2026, including results and a resource update from Ogama-Rockland.
- **Valuation**: After adjusting our metal price assumptions (we previously adjusted our discounted NAV from 2025E to 2026E), our NAV/sh (2026E) increases from C$2.41/sh to C$2.77/sh. **Using a similar target P/NAV multiple of 0.61x (previously 0.61x), our target increases from C$1.50/sh to C$1.70/sh.** The company is currently trading at 0.35x P/NAV. **We continue to view 1911 as a "re-rate" opportunity** as the path to production and cash flow is a narrower timeline (within two years) compared to other developers due to its past-producing history, existing underground development, large land package and exploration potential.

Gold X2 Mining Inc. (AUXX:TSX, C$1.10/sh target, Outperform)

- **Update**: Previously known as Goldshore Resources, Gold X2 Mining Inc. continues its strategy of advancing the +6.0M oz Au Moss Gold deposit (100%, northwestern ON) towards a top-tier gold production profile in Canada. In December, the company announced the closing of the Kesselrun Resources Ltd. acquisition (~C$13M) adding 5,000 ha adjacent to the west of Moss Gold for a combined ~30,000 ha land package, which also includes the past-producing, high-grade Huronian gold mine. The acquisition positions Gold X2 for potential resource growth and development synergies along with its Moss Gold project (ie. continuation of the trend to the southwest). We remind investors that the company has: i) invested over C$75M of capital; ii) completed approximately 100,000 m of drilling on Moss; and iii) expanded the deposit to 1.54M oz Au Ind. resources (at 1.23 g/t Au) and 5.2M oz Au Inf. resources (at 1.11 g/t Au). **The resource only encompasses 3.6 km of a +35 km trend.** It remains open at depth and along strike – and importantly, it is one of a few major Canadian resource-stage gold deposits (ie. pre-PEA) with an eye on development in the near term (three to five years).
- **Catalysts for 2026:** The company continues its 50,000m drill program (grade control, follow-up drilling at high-priority targets/regional exploration) and we expect further results through H1 2026. **Working with G Mining Services, we expect the company to announce an updated resource (from new drilling data and over 15,000 m of re-assayed historical core) and publish a PEA** (focusing on developing high-grade starter pit for increased production and accelerated payback). In expanding its investor reach and trading volumes, the company is working towards a potential **listing on a major US exchange, targeting 2026.**
- **Valuation**: After adjusting our discounted NAV from 2025E to 2026E, warrant/option exercises in 2026 and our metal price assumptions, our NAV/sh estimate decreases from C$3.31/sh NAV/sh (2025E) to C$2.86/sh (2026E). **However, our weighted average multi-valuation approach (30% NAV, 15% $/oz M&I, 25% $/oz M&I, Inf., 25% P/NPV, 5.0% take out value) increases our target price from C$0.75/sh to C$1.10/sh.** The company is currently trading at 0.25x P/NAV.

Heliostar Metals Ltd. (HSTR:TSXV, C$5.15/sh target, Outperform)

- Update: We recently initiated coverage of Heliostar (see *"Immediate Production with Robust Growth Profile in Mexico"*, December 18, 2025) highlighting: i) the company's Mexican-focused production status from La Colorada; ii) near-term flagship development asset Ana Paula with an estimated ~95,000 oz/yr Au from underground; and iii) significant longer-term value in Cerro del Gallo and San Antonio (+C$1.3B in discounted NAV contribution). We estimate the company to reach the 300,000 oz/yr Au mark by ~2035, while the company has a longer-term strategic goal of 500,000 oz/yr Au.
- Catalysts for 2026: At the Veta Madre pit, one of three pits at La Colorada, the company is focusing on a cutback to access ore for production in 2026 along with the Veta Madre Plus target, a higher-grade 28,000 oz Au resource target zone to south of pit, with confirmation drilling ongoing prior to commencement of mining in mid-2026. At San Agustin, mining has recommenced while expanding the open pit and raising leach pad. After recently releasing results of a PEA at Ana Paula, more drilling results from a 20,000 m program are expected ahead of a FS in Q1 2027. At Cerro del Gallo, we expect permitting and optimized study updates in 2026 (we estimate production in 2031).
- Valuation: Upon our initiation, we based our valuation on a 2026E NAV/sh (C$8.49) reflecting a blended target P/NAV multiple of 0.49x (immediate production of <50,000 oz/yr Au and upcoming development assets). **After adjusting our Au, Ag prices (we have also increased Cu from US$4.25/lb to US$5.00/lb), our 2026E NAV/sh has increased from C$8.49/sh to C$10.43/sh; as such, our target price increases from C$4.25/sh to C$5.15/sh,** currently trading at 0.25x 2026E NAV. Based on our estimated production for 2026, we estimate US$0.22/sh in operating cash flow (before working capital items) or 8.7x P/CF and US$28 M in free cash flow.

Revival Gold Inc. (RVG:TSXV, C$2.05/sh target, Outperform)

- Update: The company announced positive drill results from its 13,000 m drill program (~100 holes) at its flagship PEA-ready Mercur project (100%, UT), all in the Rover target area. Mercur is a shallow oxide Au deposit and, as such, broader extensions can potentially translate into resource/mine life expansion and lower extraction costs. The remaining holes (~65) are expected to be released through to Q1 2026. The weighted average fire assay gold grade is 0.73 g/t Au and the AuCN/AuFA ratio (an indicator of gold leachability) is 83%, comparing favourably to the PEA estimates. In addition, the company exercised its option to acquire 100% of Barrick Mining Corporation's interest in Mercur as per an Option to Purchase Agreement (May 2021) resulting in approximately 7,200 ha (previously, Revival consolidated ground held by a successor to Homestake Mining Company and various other owners).
- Catalysts for 2026: The company's near-term focus is on Mercur and we expect exploration results in Q1 2026 while also awaiting the PFS. Also at Mercur, we expect the company to advance heap leach restart permitting preparations. At Beartrack, drilling commences with 3,900 m of core drilling, south of Joss (higher grade, underground potential) and we expect results in Q1 2026.
- Valuation: After adjusting our discounted NAV from 2025E to 2026E and our metal price assumptions, **our NAV/sh estimate increases from C$3.99 to C$4.68; as such, adjusting our target P/NAV multiple goes from 0.46x to 0.44x and our target price/sh increases from C$1.85 to C$2.05**. Revival is currently trading at 0.15x 2026E P/NAV. Our target price is based on: i) the permitted and past-producing status of the Mercur and Beartrack-Arnett mines along with existing infrastructure; ii) modest capital required at both to restart production; iii) near-term ramp-up (mid-2029) of production and cash flow at Mercur; and iv) upside from additional sulphide resources at Beartrack-Arnett.

Skeena Resources Limited (SKE:TSX, C$30.00/sh target, Neutral)

- Update: The company is well funded to production at Eskay Creek (100%, northern BC) with a committed capital of US$750M from Orion Resource Partners. With funding in place, the company still needs key permits in order to proceed to construction and commercial production. Although we estimate a ~75% Au/25% Ag revenue split, Eskay Creek is set to become a **significant silver producer at an estimated ~9.0M oz Ag production (years 1 to 5) from a reserve base of 88 M oz Ag.** In response to the Trump Administration's tariffs earlier in 2025, the BC Government responded by expediting mining permits, placing Eskay Creek on the list as one of 18 projects in BC.
- Catalysts for 2026: The company has guided toward **updated 43-101 reserves/resources mid-2026,** while we also await **pending studies at Skeena's satellite deposit Snip (100%, Golden Triangle)**, providing high-grade material to a centralized mill at Eskay Creek in extending mine life and filling in the back half of the Eskay Creek mine life. By mid-2027 we estimate first gold production.
- Valuation: After adjusting our discounted NAV from 2025E to 2026E and our metal price assumptions, **our C$30.72/sh (2025E) NAV increases to C$36.41 while our target price increases from C$25.10/sh to C$30.00/sh** having maintained our blended target P/NAV multiple of 0.82x (currently trading at 0.97x). As such, we are maintaining our Neutral rating. Our target multiple reflects: i) a fully funded DFS stage, high-grade, multi-million oz Au eq project (Eskay Creek); ii) located in a mining friendly region; iii) a payback of less than two years; and iv) the potential for higher-grade ore from Snip to be blended as a satellite deposit (we carry Snip on a C$/oz basis and will review our model with anticipated inputs once the engineering study is completed).

STLLR Gold Inc. (STLR:TSX, C$4.00/sh target, Outperform)

- Update: The company continues advancing its Tower (100%, ON) and Colomac (100%, NT) advanced-stage Au development projects, which we estimate for earliest production in 2031. Nearer term, the company has the potential to add production (~18,000 oz/yr Au) and cash flow from its Hollinger tailings project (100%, ON). The company released the last of Hollinger's results demonstrating uniform grade distribution, with most holes returning mineralized values throughout their full length. We view this as significant as Hollinger has the potential to drive near-term cash flow and NPV. Although no deal structure has been concluded, we have assumed: i) **processing at another mill in the Timmins region (avoiding the capital needed to build own milling capacity); ii) 20 years of material to process at an average grade of 0.45 g/t Au; and iii) estimated operating costs of <C$20/t (processing, G&A only).** As per its **C$30M bought deal and private placement in October, Agnico Eagle Mines Limited increased its pro rata ownership to ~11% as well as Eric Sprott now at 15%.**
- Catalysts for 2026: We are expecting a resource update at Hollinger and metallurgical results to assist in defining our valuation (C$153M). **Based on our updated long-term gold price and Hollinger's assumptions above, potentially could result in annual near-term cash flow of ~C$25M**. Beyond 2026, we expect a PFS at Tower in 2027.
- Valuation: After adjusting our discounted NAV estimate from 2025E to 2026E and our near-term metal prices, **our NAV/sh increases from C$15.79/sh to C$17.45/sh while we are increasing our target price from C$3.85 to C$4.00/sh.** Although the contribution of Hollinger could potentially be a swing factor in our valuation, **we have slightly reduced our blended target multiple from 0.25x P/NAV to 0.23x in combination with our increased NAV/sh.** The company is currently trading at 0.10x P/NAV. Our current target reflects: i) Hollinger tailings project adjustment (resource update and metallurgical testing expected); ii) a combined +16.0M oz Au resource in two PEA ready projects both located in Canada (Tower and Colomac) equalling decades of mineral inventory; and iii) Agnico Eagle Mines Ltd. as the largest holder of STLLR (11%) along with several JV properties surrounding STLLR's Tower gold project. STLLR is currently trading at C$31 EV/oz Au M&I and C$14 EV/oz M&I, Inf. With regards to the ownership and infrastructure in the Timmins region, **an opportunity exists for a larger player to emerge, of which STLLR's Hollinger and Tower project could become a piece of that portfolio.**

Troilus Mining Corp. (TLG:TSX, C$3.85/sh target, Outperform)

- Update: In November 2025, the company ("TLG") announced an increase to its previously announced debt financing mandate from US$700M up to US$1.0B on the back of current commodity market strength and resulting improvement to Troilus Au-Cu project (100%, northern QC) economics relative to the conservative assumptions used in the FS. The announcement allows TLG to meet a funded construction package milestone for Troilus in 2026 for development. In addition, the company announced a C$173M financing; as such, we estimate TLG to have a year-end cash position of ~C$200M. We estimate production at Troilus in 2029 at an average ~260,000 oz/yr Au and ~25M lbs/yr Cu. The LOM revenue split is ~85% Au/15% Cu (ignoring minor Ag revenues). On an Au eq. AISC basis, we estimate ~US$1,200/oz Au eq**. We view Troilus as a large-scale operation at 50,000 tpd, which we estimate to be a "Top Five" producing Au mine in Canada in term of oz Au produced.** Of note, unlike other developers, Troilus has a construction ready team in place.
- Catalysts for 2026: The company expects to complete the expanded **debt financing package during Q1 2026**. With regards to **permitting, the company has guided toward H2 2026** for provincial and federal permit decisions. As such, we expect completion of the permitting phase en route to finalizing overall project financing (end of 2026) and pit dewatering also to finish in mid-2026. Longer term, we expect construction to start in late 2027 with commissioning and pre-commercial production by mid-2029.
- Valuation: After adjusting our discounted NAV estimate from 2025E to 2026E and increasing our near-term metal price estimates (including Cu from US$4.25/lb to US$5.00/lb) **our NAV/sh estimate goes from C$4.63 to C$5.77, while our target price/sh increases from C$3.10 to C$3.85 (maintaining our blended target P/NAV multiple of 0.67x, now trading at 0.31x P/NAV).** The company continues to be backed by: i) a past-producing, brownfields development asset with scale and resource expansion; ii) ample amounts of key infrastructure inherited; iii) a large (~10M oz Au only) resource; and iv) an attractive jurisdiction with strong provincial support. Year to date, the shares of TLG have increased ~460% along with agreements for commercial offtake terms, engineering progress/milestones and continued financing momentum for a company that originally may have been seeking a partner based on its earlier market capitalization and financial capacity. **We believe more upside remains as Troilus re-rates while advancing towards a large, long-life and significant Au-Cu producer meeting development milestones in the next 1.5 years, and also benefitting from government critical mineral strategies and investor enthusiasm.**

U.S. Gold Corp. (USAU:Nasdaq, US$36.00/sh target, Outperform)

- Update: We initiated coverage on U.S. Gold Corp. in November 2025, after earlier visiting the company's FS-ready, permitted CK Gold Project (100%, WY). Based on our visit and PFS results, we estimate production to commence in 2029, ramping up to an average rate of 108,000 oz/yr Au eq. at AISC of US$1,100/oz Au eq. over a 10-year mine life. Due to the regional infrastructure and proximity to centres such as Cheyenne and Denver, we estimate a modest capital program of US$330M (versus US$276M in PFS/SK 1300, 2.5-year construction period).
- Catalysts for 2026: The company's near-term focus is on CK Gold while we expect a FS (refining the two previous PFSs) by the end of January 2026. Also later in 2026, we expect the company to move to financing and construction decision stages in developing CK Gold.
- Valuation: After adjusting our discounted NAV model from 2025E to 2026E along with our metal price assumptions and the recent US$31.2M private placement in December 2025, our NAV/sh increases from US$40.92 to US$56.41. **Adjusting our blended target P/NAV multiple from 0.59x to 0.63x (trading at 0.35x), our target price/sh increases from US$24.00 to US$36.00.** Our target price is based on: i) a 1.4M oz Au permitted, Au-Cu development project, at a time when there are very few permitted projects; ii) located on state land (no direct federal involvement); iii) low technical risk as an open-pit, concentrate producer shipping to off site (ie. no cyanide in production); and iv) a potential aggregates opportunity from CK's waste rock as a significant additional revenue stream.

West Red Lake Gold Mines Ltd. (WRLG:TSX, C$2.70/sh target, Outperform)

- Update: In attaining full scale operations by early 2026, the company announced recent operational results with mined ore production increasing 24% month over month at the Madsen mine (100%, northwestern, ON). Next items include readying the shaft for operational use that will improve capacity and flexibility for material movement and taking receipt of final equipment/haul truck. In addition, the company announced **PEA results for its nearby, high-grade (8.0 g/t Au) Rowan deposit** (100%, northwestern ON) evaluating it as a separate operation with "off site" processing, equating to 35,000 oz Au/yr, five-year mine life, **C$70M capital, US$1,408/oz AISC, NPV of C$125M, 41.9% IRR.**
- Catalysts for 2026: At Madsen, we expect a commercial production announcement (50,000 oz/yr Au at 600 tpd consistently versus capacity of 800 tpd) and additional drilling results. We expect the company to incorporate the PEA-ready Rowan deposit into the mine plan (after a PFS in 2026), which we estimate to be a significant value driver (company guiding to break ground by 2028) as well as further guidance on 2026E production. The company commenced a 3,000 m drill program at Fork, a potential high-grade near-mine resource expansion target, and we await positive results. Combined with Rowan, the company is pursuing its hub and spoke growth strategy.
- Valuation: After adjusting our discounted NAV from 2025E to 2026E along with our metal price assumptions, our NAV/sh has increased from C$2.40/sh to C$3.10/sh. **Adjusting our blended target P/NAV multiple from 0.85x to 0.87x our target price/sh increases from C$2.05 to C$2.70. Upon commercial production, we estimate re-rating/multiple expansion, decreasing discount rates (from 7.5% to 5.0%) and the gap between current and fully valued NAV multiples to decrease.** The company is currently trading at 0.33x P/NAV. Our blended target multiple is based on: i) imminent commercial production in early 2026; ii) shaft status update to add more capacity; and iii) resource update and combined PFS including Rowan in 2026. We will revisit our discount rate upon commercial production. As WRLG nears production and continues to ramp up to steady-state production levels in a rising gold price environment, **we note P/CF forward multiples (2026E to 2029E) are less than 3.0x, which we regard as unwarranted for an imminent commercial producer**.

Western Exploration Inc. (WEX:TSX, C$2.45/sh target, Outperform)

- Update: At the Aura Au project (100%, NV), the company continues to demonstrate potential along the Tomasina Fault (a ~3.0 km northwest-southeast structure along the eastern end of Aura), releasing four RC holes (ie. shallow holes). Best intercepts were to the north, down-dip from Saddle towards the GAP Zone including: **15.2 m at 0.86 g/t Au, 4.1 g/t Ag (including. 1.5 m at 4.68 g/t Au, 10 g/t Ag) from hole WG471 and 19.8 m at 0.45 g/t Au, 11 g/t Ag (including 1.5 m at 3.24 g/t Au, 71 g/t Ag) from hole WG468**. The Tomasina Fault represents a direct analogy to the company's Gravel Creek discovery/deposit, with the added advantage of a potential 3.0 km strike length from three outcropping zones and shallower targets (100 m to 450 m depth). As the Tomasina Fault is a shallower zone than Gravel Creek, there is the potential to build resources faster. This underexplored area has demonstrated some historical high-grade, shallow mined intercepts from the nearby Wood Gulch mine (eg. 13.72 m at 79.26 g/t Au eq hole WG-159, 13.72 m at 29.59 g/t Au eq. hole WG-125). Conservatively, we estimate each of these areas could represent 0.5M t to 1.0M t. **The company has openly stated a 2.0M oz Au, 30M oz Ag resource goal, which could be achieved with the Tomasina Fault and/or Gravel Creek.** Of note, as a potential processing option, Jerritt Canyon (First Majestic Silver Corp.) is 25km south of Doby George.
- Catalysts for 2026: Early in 2026, we expect a corporate update and details of the next drill program (diamond drilling versus the RC drilling in the next round). At Doby George, the company's PEA ready, near-term production gold project, **we expect an update on the permitting path going forward (the company has guided toward a 30-month timeline).**
- Valuation: After adjusting our discounted NAV from 2025E to 2026E along with our metal price assumptions, **our NAV/sh has increased from C$6.07/sh to C$7.09/sh.** Adjusting our blended P/NAV target multiple from 0.34x to 0.35x, **our target increases from C$2.05/sh to C$2.45/sh (currently trading at 0.10x P/NAV)**. Our P/NAV reflects: i) a 1.5M oz Au eq. total resource among three deposits; ii) robust, high-grade exploration potential at the Gravel Creek deposit potentially translating into a multi-million oz, long-life deposit; iii) ample amounts of regional infrastructure already in place with private land available for additional mine infrastructure; iv) an attractive mining jurisdiction (NV); and v) notable key shareholders including Agnico Eagle Mines Ltd. (12%).

Important Disclosures and Disclaimers

This research has been prepared for the general use of the institutional clients of Velocity and must not be copied, either in whole or in part, or distributed to any other person. If you are not the intended recipient, you must not use or disclose the information in this research in any way. If you received this research in error, please tell us immediately by return e-mail and delete the document. We do not guarantee the integrity of any e-mails or attached files and are not responsible for any changes made to them by any other person. Velocity has established and implemented written policies and procedures to minimize conflicts of interest between its Clients and Velocity and its Analysts. Velocity does not allow its Analyst or their household family members to hold or trade in any security on which the Analyst writes research reports. Other than what is disclosed below, Velocity is not aware of any material conflict of interest between itself and its Analyst and the Firm's Clients. No employee, officer or director of Velocity is a director, officer or employee of the issuer or has received remuneration from the issuer, other than normal course investment advisory or trade execution services in the last 12 months. As with all employees of Velocity, a portion of the Analyst's compensation may be derived from Investment Banking earnings. The Analyst does not receive any direct compensation from Investment Banking fees received from this issuer.

Analyst Certification

I, Paul O'Brien, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report. I receive compensation from Velocity that is based upon various factors including Velocity total revenues, a portion of which are generated by Velocity Investment Banking activities.

** Note: Paul* O'Brien *also serves as Director for two publicly-listed companies (MTH.TSXV and RI.CSE), which are separate from the analyst's coverage group and unrelated to any issuers discussed herein.*

Company-Specific Disclosures

Is this an Issuer specific or Sector related research publication?	Sector
Does the Analyst, Associate, or any person involved in the preparation of this report have a direct or indirect financial interest (long or short) in the securities of the subject issuers?	No
Is any partner, director, officer, employee or agent of Velocity also an officer, director or employee of the issuers, or serve in any advisory capacity to the issuers?	No
Does the Analyst have any material non-public information with respect to the subject issuers?	No
Does Velocity or the Analyst have any actual material conflicts of interest with the subject issuers?	No
During the last 12 months, has Velocity provided Investment Banking related services or Financial Advice to the subject issuers?	Yes [1]
During the last 12 months, has Velocity managed or co-managed or participated in any public offering or private placement of securities of the subject issuers?	Yes [2]
During the last 12 months, has the Analyst had an onsite visit with these issuers? • If 'Yes', has the issuer paid or reimbursed any of the Analyst's travel expenses with respect to the visit?	Yes [3]
Has the Analyst received any compensation from the subject issuers in the past 12 months?	No
Is Velocity a market maker in the issuers' securities at the date of this report?	No

No

[1] During the last 12 months, Velocity has provided strategic advisory services to Revival Gold and U.S. Gold.

[2] During the last 12 months, Velocity has participated in a public offering of securities for 1911 Gold, Heliostar Metals and Troilus Mining.

[3] During the last 12 months, the Analyst has conducted an onsite visit to material operations of Western Exploration and Heliostar Metals. The issuers provided some meals and accommodation as part of those visits.

General Disclaimers

Nothing in this research shall be construed as personal advice, or a solicitation to buy or sell any security or product, or to engage in or refrain from engaging in any transaction. In preparing this research, we did not take into account your investment objectives, financial situation or particular needs. Velocity's sales department, trading personnel and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions which are contrary to the opinions expressed in this research. Before making an investment decision on the basis of this research, you need to consider, with or without the assistance of an adviser, whether the advice is appropriate considering your particular investment needs, objectives and financial circumstances. There are risks involved in securities trading. The price of securities can and does fluctuate, and an individual security may even become valueless. International investors and Wholesale clients are reminded of the additional risks inherent in international investments, such as currency fluctuations and international stock market or economic conditions, which may adversely affect the value of the investment. This research is based on information obtained from sources believed to be reliable, but we do not make any representation or warranty that it is accurate, complete or up to date. We accept no obligation to correct or update the information or opinions in it. Opinions expressed are subject to change without notice. No member of Velocity accepts any liability whatsoever for any direct, indirect, consequential or other loss arising from any use of this research and/or further communication in relation to this research. Clients should contact analysts at, and execute transactions through, a Velocity entity in their home jurisdiction unless governing law permits otherwise. The date and intraday timestamp is given for the share price and market cap, otherwise #CLOSE indicates the final price at which the security is traded in the relevant exchange on the date indicated. Members of the Velocity Sales & Trading Department provide desk commentary that is not a product of the Velocity Research department and not subject to any other regulation regarding independence in the provision of equity research. Velocity cannot accept any trading instructions via e-mail as the timely receipt of e-mail messages, or their integrity over the Internet, cannot be guaranteed. Velocity employees outside of the Research Department may buy and sell shares of the companies that are recommended for their own accounts and for the accounts of other clients.

Research Dissemination Policy

The Research Distribution Policy of Velocity is to allow all clients that are entitled to have equal access to our research and all final research reports are disseminated to all clients and potential clients of Velocity at approximately the same time in electronic format. Clients may also receive Velocity research via third-party vendors. To receive Velocity research reports, please contact your Registered Representative. Reproduction of any research report in whole or in part without permission is prohibited.

Ratings and Recommendations

Velocity's rating system reflects our outlook for expected performance of an issuer's equity securities related to its peer group over the next 12 months.

- Outperform rating represents a security that is expected to provide a return greater than its peer group
- Neutral rating represents a security that is expected to provide a return in line with its peer group
- Underperform rating represents a security expected to provide a return less than its peer group

Sensitivity Analysis: Clients receiving this report can request access to a model which allows for further in-depth analysis of the assumptions used, and recommendations made, by the author relating to the subject companies covered. To request access to the model, please contact the Analyst.

Country-Specific Disclosures

Canada: In Canada, Velocity Trade Capital Ltd. ("VTC") is a member of the Canadian Investment Regulatory Organization ("CIRO"), the Canadian Investor Protection Fund ("CIPF") and a participating member of all protected Canadian marketplaces including the Toronto Stock Exchange and TSX Venture Exchange. CIRO Rule 3600 Disclosures can be obtained by writing to Velocity Trade Capital Ltd. at 100 Yonge Street, Suite 1800, Toronto, Ontario, Canada, M5C 2W1.

Australia: In Australia, research is issued and distributed by Velocity Trade Limited ("VTL"). Velocity Trade Limited is regulated by the Australia Securities & Investment Commission and holds an Australian Financial Service License (AFSL) No. 329813. Velocity Trade Limited is also a Market Participant of the Australian Securities Exchange. There are robust information barriers established and maintained to protect the independence of research at Velocity. In spite of the strong controls, recipients of Velocity Research should be aware that inherent potential conflict of interests exist.

New Zealand: In New Zealand, research is issued and distributed by Velocity Trade Limited, which is regulated by the Financial Service Provider FSP 20003.

South Africa: Velocity Trade Financial Services (Pty) Ltd ("VTFS") is an Authorised Financial Services Provider with the Financial Services Conduct Authority of South Africa (FSCA), FSP No. 43295.

United States: The Analyst that prepared this report is not registered or qualified as a research analyst with FINRA and is not subject to U.S. rules with regards to the preparation of research reports and the independence of analysts.

This third-party research report is distributed in the United States ("US") to Major US Institutional Investors (as defined in Rule 15a-6 under the Securities Exchange Act of 1934, as amended) only by Wedbush Securities Inc. ("Wedbush"), a broker-dealer registered in the US (registered under Section 15 of the Securities Exchange Act of 1934, as amended). All responsibility for the distribution of this report by Wedbush in the US shall be borne by Wedbush. This report is not directed at you if Wedbush is prohibited or restricted by any legislation or regulation in any jurisdiction from making it available to you. You should satisfy yourself before reading it that Wedbush is permitted to provide research material concerning investments to you under relevant legislation and regulations. All U.S. persons receiving and/or accessing this report and wishing to effect transactions in any security mentioned within must do so with: Wedbush Securities Inc. 1000 Wilshire Blvd, Los Angeles, California 90017, +1 (646) 604-4232 and not with the issuer of this report.

United Kingdom: In the U.K., Velocity Trade International Ltd. ("VTI") is authorised and regulated by the Financial Conduct Authority (FCA Registered Number 497263). This report has not been approved by VTI. For the purposes of section 21 of the Financial Services and Markets Act 2000 this report is only intended for persons who are investment professionals within the meaning of article 19 of the Financial Services and Markets Act 2000 Order 2005 and this report is not intended for, and should not be relied upon, by any other person.

Velocity and the Analyst that prepared this report based it on information we believe to have been reliable as of the date of publishing. We cannot be held responsible for any loss if the information was not correct or if it changed since this report was published. This report does not constitute an offer to sell or the solicitation of an offer to buy any of the securities discussed herein. Velocity has decided to absorb the cost to produce research and does not charge eligible clients for research. If you want to request archived research or past recommendations, please contact the Analyst.

Netherlands: In the Netherlands, Velocity Trade's fully-owned subsidiary, VTC Europe B.V. ("VTCE"), is regulated as an investment firm by the Dutch Authority for the Financial Markets / De Autoriteit Financiële Markten (AFM).
https://www.afm.nl/en/professionals/registers/vergunningenregisters/beleggingsondernemingen/details?id=49B9B54C-70AB-E811-80DD-005056BB0C82

VTCE's remuneration policy is designed to support key business strategies and to create a strong, performance-orientated environment. At the same time, the purpose of the policy is to attract, motivate and retain the company's talent. The policy ensures that a significant proportion of the remuneration of executives and others is aligned with corporate performance. The variable remuneration for all employees is discretionary and designed to reward outstanding performance, is dependent on financial and non-financial criteria, and is in line with VTCE's approach to risk. The company does not pay guaranteed bonuses. VTCE's remuneration policy takes into account and complies with the Dutch Financial Supervision Act. The Management and members of the Board of Directors of VTCE comply with regulatory competency standards. They have been assessed and approved by the Dutch Authority for the Financial Markets in respect of their integrity and suitability. All board members will undergo constant training to ensure that they will maintain sufficient knowledge and skill levels. They will stay abreast of important industry and regulatory developments to enable them to perform their duties adequately at all times.

This research was prepared for the exclusive use of institutional and professional investors and should not be used by or distributed to non-institutional investors. If you received this research in error, please tell us immediately by return e-mail and delete the document.
